ENVIRONMENTAL POLICY

ALBION FINE FOODS

Prepared by

ANGEL DRANDEV
QA TECHNICAL MANAGER
ALBION FINE FOODS

Approved by

TOBY RAPHAEL
GENERAL MANAGER
ALBION FINE FOODS

“

A dynamic food business, built on traditional values. We strive for continual improvement through innovation and efficiency.

”

Albion Fine Foods is a service provider for the procurement, storage, packing and distribution of food products along with cleaning and consumable products.

The company's objective is to minimise our environmental impact whilst we continue to meet our obligations to supply safe and legal products that meet or exceed our customer's expectations. To accomplish this, we plan to implement procedures and systems to identify and minimise environmental impacts as part of our 2020 sustainability goal.

We are committed to the continual improvement of our environmental performance and the prevention of pollution. We achieve this by setting and reviewing objectives for environmental performance based on our assessment of the most significant environmental impacts of our operation.

Our Environmental Policy is understood by all key personnel and communicated to all new staff when employed. All Albion employees contribute to ensure that the objectives for Environmental Management are met at all times. The Environmental Policy is reviewed annually for continued suitability and is made available to all staff once reviewed.

Toby Raphael

General Manager

Integrity, Unity,
Consistency,
Innovation.**”

Our Core Values

*100% Renewable
Energy Providers.*

*60% of our Solid
Waste is recycled.*

We seek to partner with suppliers who have a strong sustainability policy and we promote our ecologically sound products.

We have minimised and are reducing packaging added to the supply chain.

All waste cardboard and plastic is collected and recycled.

Deliveries to customers are made using returnable crates, which we collect at point of delivery.

Our gas and electricity supply is 100% renewable, covering; commercial fridges, freezers, lighting, packaging machinery, forklifts, computers and heating.

Our vehicles are fully compliant with ULEZ (Ultra Low Emission Zone) and have Samsara route optimisation and fuel reporting functionality.
